Erwan Marega

Full-stack web developer

maregaerwan@gmail.com · linkedin.com/in/erwan-marega · github.com/erwanmarega · www.ewmdev.com

PROFILE

Full-stack web developer, apprentice at Cegedim Business Services (September 2025 – July 2027) alongside a Mastère Dev Manager Full Stack at Efrei. Trained in design and UX as much as in code.

EXPERIENCE

2025 - 2027 — **Software Engineer — Apprenticeship** • Ongoing

Cegedim Business Services

Teams RH, Cegedim's HR information system (payroll, time tracking, HR portal), used by companies ranging from a handful of employees to tens of thousands.

- Building front-end features in Vue.js, consuming APIs with Axios
- Migrating from the Options API to the Composition API, and components of the in-house UI library
- Unit testing with Vitest, bug analysis and fixing
- Automated integration and deployment with GitLab CI/CD
- Agile ceremonies (daily stand-ups, demos) and story point estimation

`Vue.js · Vitest · Axios · GitLab CI/CD · Cursor (a fast model to execute, a stronger one to analyse)`

2024 - 2025 — **Web Communication Assistant — Apprenticeship**

Présence Verte

- Redesign of the website and the intranet (React, Vue.js, Node.js, WordPress)
- Web project management and Figma mock-ups, in line with UX/UI requirements

`React · Vue.js · Node.js · Figma · WordPress`

2023 — **IT Department Internship**

Banque Palatine

Two months in the IT department: introduction to Java, API development and search engine optimisation (SEO).

EDUCATION

2025 - 2027 — **Mastère Dev Manager Full Stack (master's level)**

Efrei · Villejuif

Software architecture, back-end and project management, alternating with my work at Cegedim.

2022 - 2025 — **BUT MMI (bachelor's in multimedia and web)**

Université Gustave Eiffel · Meaux

Design, UX/UI and web development. This is where I learned to think about the interface before the code.

2022 — **Baccalauréat Technologique STI2D (high-school diploma, engineering track)**

Lycée Pierre de Coubertin · Meaux

SKILLS

Front-End	JavaScript, TypeScript, Vue.js, React, Angular, Tailwind CSS
Back-End	Node.js, PHP, Java, MySQL
Tools & methods	Figma, WordPress, Git, GitLab CI/CD, Vitest, project management, UX/UI
AI	Claude, Cursor, Kimi

PROJECTS

Hovly	Build your real-estate dashboard in under a minute.
SpotCalendar	Track music releases through a modern interface connected to the Spotify API.
Postulo	Connects your students to your dashboard. For apprenticeship centres and schools whose students are looking for a work-study placement.
ADI	Full redesign of the website of ADI, a company specialised in property fit-out.
Git Agent	CLI assistant that writes commit messages and branch names, and plugs into Jira and GitHub.
